Quintus Elementum is a musical project created by Blake Carpenter. Blake has been making music of some kind for almost 40 years. From folk to metal and most recently synthwave (more like 80's revival) but has always loved instrumental electronic music of the New Age kind and those are the sounds you will get from Quintus Elementum.

## More About Quintus Elementum

From out of the shadows comes Quintus Elementum. A new project from Blake Carpenter. Electronic music from the depths of the earth and the far reaches of the universe. Blake will be digging deep into the collective essence of everything blending the sounds of synths, winds, strings and more to bring you some tantalizing and moving musical art. Songs about life, death, love and hate, perhaps even a little about surviving this perilous life we all live. Everyone is familiar with the four main elements, Earth, Air, Water and Fire but there is another. The Fifth Element, Ether, Essence, Spirit. It is a collective of everything, you, me, them, it. One consciousness.

We are Quintus Elementum!

## Bio

Blake has been making music of some kind for nearly half a century. From folk to metal with a few random bits of experimental stuff thrown in for good measure Blake's styles have varied greatly. With a love for almost all styles of music he has used that love to create and in doing so never was able to set a cohesive path for himself.

That being said, he is still having that same struggle these many years later. He has a project called Max Nova which is a synthwave concept project about a being from the end of all universes and the future who has come back to save the end of all things. The Max Nova project introduced him to the synthwave community and he began releasing music under his name as well as Max Nova, A more retrowave style Blake Carpenter is receiving great responses from within the community but Blake has more desires.

With a love for things more, well, magical, Blake is adding yet another project to his already very busy schedule. Quintus Elementum is to be an electronic project where he can be more open about his beliefs and ideas. The music will feature more synths and orchestral elements telling stories of love, hate, life, death, magick and more.
